

FOAM ALTERNATIVES

Need to replace your foam products? PRISM has a wide assortment of alternatives for cups, bowls, plates and carryout containers! Here are just a few...Plus, we can meet your other needs too—towels, tissue, gloves, dispensers, cleaners, napkins, can liners, etc! WE'RE HERE FOR YOU!

Compostable

Sugarcane bagasse and molded fiber products are biodegradable and compostable. These products are used for both hot and cold products and it can be used in microwaves and refrigerators.

PET Plastic

These containers can hold hot and cold items and come in various shapes and sizes. PET can be recycled making it environmentally friendly and is generally microwavable.

Polypropylene (PP)

Leak resistant, microwavable and dishwasher safe these poly containers hold both hot and cold items.

MFPP

Mineral filled polypropylene (MFPP) containers are crafted from a material that combines the lightweight, durable nature of plastic with mineral fillers like talc or calcium carbonate. This blend makes it stronger, moisture resistant and more heat resistant with less warping.

Aluminum

This durable, grease resistant material maintains the full flavor of the food. Recyclable, it is used for both hot and cold food. Used as steam table pans and as carryouts with lids, aluminum is highly versatile.

Coated Paper

Paper products come in a variety of options from poly to plant based coatings (PLA). The coating ensures these products are grease resistant and environmentally friendly.
